Clerk. Note. In the report of the treasurer for the second quarter of 1896, which was published July 25, the receipts should have read: 50 00 By cash from recorder \$122 80

The minutes of this day were By cash teachers institute... 8 00 By error the sum \$122.80 was omit-

ed from the published proceedings. A Mexican Mine.

A Californian who recently visited the town of Guanajuta, Mexico, thus describes one of the old mines at

that place: "The principal mine there now is the Valencian, and it has no less than thirty-two miles of underground workings. The main shaft is 2,700 feet deep, is of octagon and thirty-two feet across. It said to have produced \$1,000,000,000, principally in silver, and it has employed as many as from 3,000 to 5,000 men. It now employs about 1,000 men in the upper levels.

"In the lower levels and shafts are 800 feet of water. It is said that at the bottom of the shaft there is thirty feet of rich ore. All this immense work was accomplished by hand-without a particle of machinery. It is estimated that it would cost \$500,000 to erect a pumping plant to get this water out and keep it out.

"There are driveways for miles zigzaging down into the mine to a depth of 1,000 feet. It is said that at one time an owner of the mine presented several million dollars to the crown of Spain. I was told, too, that at one time there were in the neighborhood of 4,000 arastras at work in the town, and that 1,600 tons of ore were crushed every twenty-four hours. At present they are crushing about 350 tons of ore a day."- Exchange,

My little boy when two years of for the 11th inst. were read and ap- age, was taken very ill with bloody flux. I was advised to use Chamberlain's Colic, Cholera and Diarrhoea Remedy, and luckily procured part of a bottle. I carefully read the directions and gave it accordingly. He was very low, but slowly and surely he began to improve, gradually recovered, and is now as stout and strong as ever. I feel sure it saved his life. I new r can praise the Remedy half its worth. I am
